

# + Interdisciplinary Management of Periodontal and Peri-implant Soft Tissue Deformities

+ *Atelier Dental* MADRID

# Course Description

Dr. Oscar Gonzalez & Dr. Gustavo Avila

- + This advanced hybrid course (didactic + hands-on + live surgery) offered by Atelier Dental Madrid is designed to provide an integral vision on the management of periodontal and peri-implant soft tissue deformities in the context of contemporary interdisciplinary dentistry.
- + In this 3-day course a series of fundamental concepts related to the biological structures that support teeth and implants, different therapeutic options available to resolve clinical scenarios with a variable degree of complexity, and the armamentarium and materials required to successfully execute specific interventions will be reviewed and critically discussed. The participants will also have an opportunity to practice several surgical techniques in dentofoms to consolidate the main concepts addressed throughout the course.
- + Our ultimate educational objective is to provide a solid knowledge base to facilitate clinical decision-making and to optimize the outcomes of mucogingival therapy in daily practice.

# + Course information
