# Minimally invasive restorations + adhesion.

## Course objectives

- + Upgrade and expand basic concepts regarding adhesion.
- + Develop the concepts of adhesion and minimally invasive dentistry with a view to establishing step-by-step protocols and treatment plans regarding restoration treatments for patients with dental wear.
- + Become familiar with adhesive restoration and materials; prepless inlays and veneers, preparation and bonding protocols with the laboratory, importance of dental photography, and notifying the technician of the colour.

## Days 26, 27 and 28: *Theory + hands on*

*From 09:30 at 18:00*

- + Concepts of a complex treatment plan. Handling the vertical dimension.
- + Bases for diagnostic wax-ups and mock ups.
- + Restoration in patients with dental wear.
- + Updated information on materials used in restoration treatments.
- + Isolation workshop (*hands On*).
- + Concepts governing adhesive dentistry.
- + Inlays (*theory + hands on.*)

## Days 29 and 30: *Theory + hands on*

*From 09:30 at 18:00*

- + Patient rehabilitation using minimally invasive treatment (*theory*).
- + Veneers Prep, No Prep & Prep Less (*hands On*).
- + Bonding protocol.
- + Communicating with the technician, dental photography and colour.
- + Advanced photography workshop (*hands On*).
- + Conclusions.

# Speaker

*Dr. Óscar González Martín*
